Date: *[fill in]*
Project Name: FinWise AI — Intelligent Loan Eligibility, Credit Analysis & Financial Advisory Platform
Maximum Marks: *[as per rubric]*

Team Members

#	Name	Role	Contribution Area
1	<i>[Name]</i>	Team Lead	Architecture, integration
2	<i>[Name]</i>	Member	Frontend (UI)
3	<i>[Name]</i>	Member	Backend (Flask APIs)
4	<i>[Name]</i>	Member	AI/Groq integration, documentation

Idea List (Brainstormed Before Filtering)

#	Idea	Category	Priority (Feasibility × Impact)	Selected?
1	Loan eligibility + credit advisory chatbot	FinTech	High	☒ Yes (Final)
2	Static loan EMI calculator only	FinTech	Low	No — too basic, no AI value
3	Investment portfolio recommender	FinTech	Medium	No — out of scope/time
4	Expense tracker app	FinTech	Low	No — saturated market, low differentiation

5	Credit score improvement tips generator	FinTech	Medium	No — merged into final idea as a feature
---	---	---------	--------	--

Final Selected Idea: FinWise AI — an intelligent platform that checks loan eligibility, evaluates credit score impact, calculates EMI, and gives personalized financial advisory guidance using AI, before the user formally applies for a loan.

Why this idea won: High feasibility with the recommended stack (Python/Flask/Groq/SQLite), clear real-world problem, strong social + business impact, and a known reference market (loan eligibility calculators) to benchmark against.
